In claim 11, 8th line, the term "radiant" has been changed to --radiate--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicants claim, among other things, a gas cooking appliance employing a combination radiant/convection heating system including an oven cavity including top, bottom and opposing side portions, the bottom portion including a central opening, a glass panel positioned in the central opening, a plurality of air inlet vents opening into the oven cavity, a gas burner positioned below the glass panel and defining a central zone, the gas burner being adapted to radiant heat through the glass panel into the

oven cavity, a combustion airflow fan assembly for delivering a forced combustion airflow to the gas burner and a convection blower assembly including a fan located within the central zone, the convection blower assembly being adapted to generate a convective air flow which passes the gas burner and flows through the air inlet vents into the oven cavity, wherein the gas burner produces heat for both radiant and convective heating of the oven cavity, with the gas burner being visible, at least when activated, when looking into the oven cavity and through the glass panel.

The prior art of record, taken alone or in combination therewith, does not disclose nor make obvious the invention as claimed by applicants.
